

Designing for GenAI

Rajasee Rege

April 3, 2024

**Why should we care
as a design collective
about GenAI?**

It's not just about building the future with transformative tech, it's about building it for the people who will adopt it.

Will Gen AI replace designers?

COLLABORATION

Local Gen AI meetups to tinker,
discuss

Co-create on internal collaterals,
POCs

Product designers will become trusted co-pilots in helping **humanize** all of our AI Tech.

Designing for user control

What repetitive functions that users perform today are worth automating to deliver efficiency, speed without hampering quality or taking away their sense of control?

Designing for trust & feedback

How do people react to decisions and feedback from AI powered tech and how do we design for trust and transparency?

Designing for time & scale

How do our interactions with automated tech change over time/scale and influence our sense of identity and agency and in turn drive the engagement of these products?

Shaping products that harness Gen AI

PREPARE TO MEET YOUR EXPERT EXPERT DOES YOUR TAXES REVIEW WITH EXPERT REFUND

Hi James. Just add any tax docs you've got, and I'll organize them for your expert.

Docs uploaded successfully

Based on your W-2, you received company stock. Did you sell any this year?

Yes, I did

OK! Because of the sale, you'll need the Form 1099-B. I've added that to your checklist. You can download this from your broker online right now.

Write your own story with A.I.

Tell us what you want the story to be about

What type of story do you want?

Choose multiple genres to mix them together.

☐ Romance

☐ Crime

☐ Mystery

☐ Thriller

☐ Science Fiction

☐ Fantasy

☐ Historical Fiction

☐ Literary Fiction

☐ Horror

☐ Young Adult (YA)

☐ Children's

☐ Adventure

☐ Action

☐ Urban Fiction

☐ Dystopian

☐ Paranormal Romance

☐ Humor

☐ Magical Realism

☐ Suspense

☐ Detective

Tip: You can leave any field blank and our AI will pick something that best fits the story.

Who are the characters in your story?

Consider adding yourself, your friends, your family, or even your pets.

Name

Age

Gender

Anything else you'd like to add about this character?

☒ This is the main character

To build solutions that improve workflow efficiency, product designers can help you get a deeper understanding of the users' workflow through various discovery methods accelerated by gen-ai tools.

Primary research/discovery

Concept validation

Behavioral design

Designing for emotions and trust

Product assessments

Rapid prototyping for RFPs, pursuits

Gamification

Brand identity creation

Ethics gatekeepers, inclusive design

Experience Driven Gen AI- A Handy checklist for Designers

Experience Driven GenAI – Reflect on these questions, designers!

EXPERIENCE is form, function and FEELINGS

What repetitive functions that users perform today are worth automating to deliver efficiency, speed without hampering quality or taking away their sense of control?

How do people react to decisions and feedback from AI fueled tech and how do we design for trust and transparency?

How do our interactions with automated tech change over time and influence our sense of identity and agency and in turn drive the demand for such products?

Experience designer's role is pivotal in humanizing and optimizing the interaction between users and generative AI system

Personalized, dynamic experiences

Identify opportunities via research insights where gen AI can enhance user experiences through primary research and bake in user insights and requirements into design specs for the gen AI system to deliver highly personalized dynamic experiences that evolve over time and anticipate user needs and actions.

Smart feedback loops

Design intuitive feedback loops to gather user feedback on AI-generated content to improve it over time especially in case of inaccuracies or inconsistencies.

Design for trust

Provide insights, guidance to the user to build user's trust in the system by providing clarity on how the recommendations were made by the AI. Ensure user consent.

Optimize AI

Optimize interface design for a seamless transition between AI-generated and human-generated content. Consider multimodal inputs and outputs like gestures, augmented reality, biometric inputs in addition to dynamic web UI depending on the user context.

Inclusive design

Strive for inclusive design, ensuring that AI-generated content is accessible and caters to diverse user needs and capabilities by establishing a checklist of do's and don'ts

Ethics gatekeepers

Address ethical considerations in the use of gen AI, considering potential biases, ensuring fairness and uncover the psychological effects on users.

Challenges and opportunities for the experience design practice

Upskill/Reskill

Avail online courses, platforms, software, and resources specifically designed to help individuals understand and work with generative AI technologies.

Heightened collaboration

Collaborate with data scientists, AI engineers, and other experts to gain practical insights.

Experiment & prototype

Apply your knowledge through hands-on projects and prototyping on internal POCs, and client solutions to envision art of possible through continuous discovery methods.

Augment design workflow

Use AI plugins, software to fasten the creation of UX and visual artefacts, ideate and refine especially for quick wins.

Conduct product assessments

Conduct usability assessments using a revised checklist to ensure apps are rooted in ethics, fairness and satisfy user needs.

Uncover the right questions to solve

Conduct primary research for our clients to gauge and analyse business processes to identify repetitive tasks and manual processes that can be automated through AI.
